PROFESSIONAL SUMMARY

Front-end web developer and marketing automation specialist with experience building and maintaining production web pages, managing CMS content, and delivering email and multi-channel campaigns. Skilled in Oracle Eloqua, Salesforce Pardot, HTML email development, front-end code, CMS administration, campaign QA, and cross-functional collaboration with marketing, SEO, and UI/UX teams. Additional experience includes training and development, quality assurance, and client support.

CORE SKILLS

Marketing Automation: Oracle Eloqua (email, landing pages, segments, forms, campaign workflows, Eloqua Insights and Dashboard), Salesforce Pardot, AMP Scripting, campaign scheduling, campaign QA, Oracle Sales Cloud integrations, third-party application integrations

Content Management Systems: Adobe Experience Manager (AEM), Optimizely/EpiServer CMS, WordPress

Front-End Development: HTML5, CSS, JavaScript, Bootstrap, ReactJS, NodeJS, Python, Tailwind CSS, TypeScript

Quality and Delivery: Functional testing, UAT, mobile testing, quality assurance, campaign audits, content management, monthly content cadence

Design and Analytics: Figma, Photoshop, Photopea, Google Analytics 4 (GA4)

Digital Asset Management: OpenText DAM, Oracle DAM

Project and Workflow Tools: JIRA, Wrike, Workfront

Additional Skills: Training and development, LMS administration, client support, process documentation, workflow improvement

Languages: English (Proficient), Tagalog (Native)

PROFESSIONAL EXPERIENCE

Marketing Automation Specialist II

Emerson Philippines | August 2026 - Present

Contract note: Non-binding fixed-term arrangement, scheduled to end August 2027.

- Build digital assets, including emails, landing-page forms, and segments, using standard marketing automation templates.
- Set up, analyze, and complete campaign workflows, including integrations with applications such as Oracle Sales Cloud.
- Perform quality assurance and audits of emails, landing pages, forms, campaign canvases, and segments; analyze results and recommend improvements to meet guidelines and standards.
- Schedule marketing automation campaigns for activation and document processes, programs, and procedures.
- Review and approve complex designs and templates for digital assets.
- Provide technical and marketing automation platform support; troubleshoot through debugging, functional analysis, and testing.
- Research, test, and implement third-party application integrations with Eloqua; configure and extract reports in Eloqua Insights and Dashboard.

Content and Graphics Design Senior Analyst

Vertiv | November 2023 - April 2026

- Administered Optimizely/EpiServer CMS and created or optimized front-end code snippets to improve user experience and engagement.
- Managed content layouts and updates across web platforms, maintaining alignment with brand guidelines.
- Collaborated with SEO and UI/UX teams on page optimization using Figma, Photoshop, Photopea, and Google Analytics 4.
- Used Wrike for project management and JIRA for ticketing and quality assurance, including functional, UAT, and mobile testing.

- Maintained digital assets in OpenText DAM and Oracle DAM.
- Reviewed website content cadence for consistency and relevance.

Web Developer New Associate / Instructor New Associate / Transaction Processing New Associate

Accenture | February 2017 - May 2022

- Built and managed multi-channel campaigns in Oracle Eloqua, including email builds, landing pages, audience segmentation, and forms.
- Created Salesforce Pardot email campaigns using AMP Scripting and tested across devices and platforms for consistent performance.
- Validated client requirements against project objectives and business needs through discovery calls and document and asset management.
- Reviewed client HTML designs with Figma and Photoshop for design accuracy and implementation.
- Managed personalized email campaigns, promotional offers, and newsletters to support engagement and marketing objectives.
- Delivered training and assessments; guided teams on course content and duration for different audiences, provided courseware feedback, managed LMS content and administration, and contributed to process improvement and quality reviews.
- Processed health-insurance information and account setup, maintenance, renewals, and modifications using client applications; extracted and validated data from PDFs, Excel, and Word for accuracy and compliance.
- Supported client inquiries through email, chat, and client platforms; clarified source data, created account structures tailored to client needs, and recommended workflow improvements.

SELECTED WEB PAGE IMPLEMENTATIONS

Vertiv AI Hub - Front-end page-builder implementation of live production pages; monthly content cadence and QA.

Contribution: Built the pages into production using the front-end page builder and handled monthly content updates and quality assurance. Images, video, and CEROS assets were created by a separate team.
